Herbal Tea

Herbal Tea

Important information on your baby's dental health:

This drink contains carbohydrates. Frequent or constant contact of your baby's teeth with liquids containing carbohydrates may lead to tooth decay and result in further health problems.

Fennel, camomile and anise have always been well-known ingredients in babyfood. HiPP Herbal Tea is prepared from natural extracts of these herbs. This tea is suitable for supplementary liquid supply – if required, e.g. in case of perspiration or the change to complementary food from 4 to 6 months.

No prolonged sucking!

Each beverage may damage teeth (caries) caused by frequent or prolonged sucking on the bottle. Therefore: Do not leave the bottle to your baby for prolonged sucking and do not use the bottle as a pacifier or as an aid to help your baby fall asleep. Always hold the bottle yourself when feeding your baby and let your baby drink quickly. Please ensure regular dental care from your baby's first tooth. Encourage your baby to get used to drinking from a cup from the 8th month.

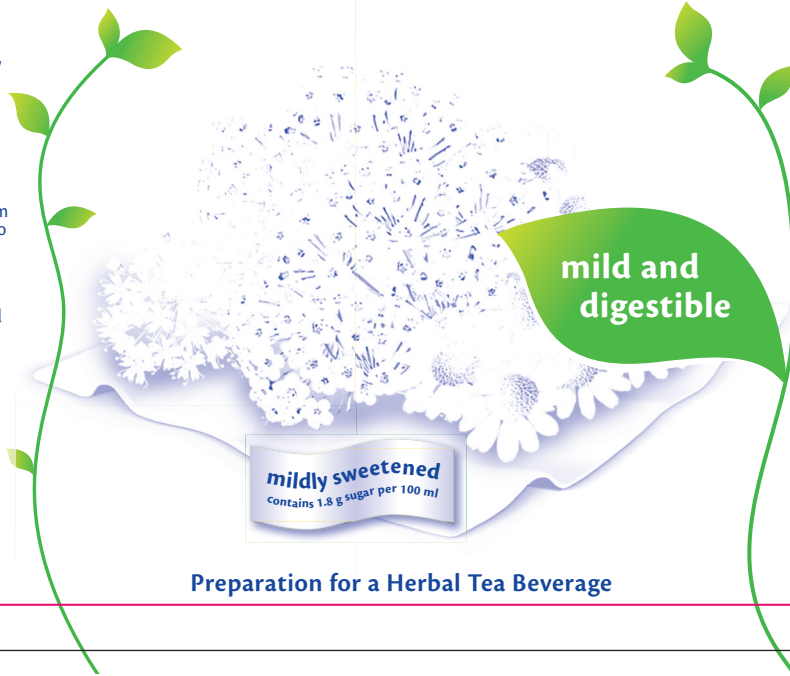

Preparation:

Bottle / cup for infants:
 Sprinkle ½ teaspoon (2 g) into a bottle or a cup with 100 ml freshly boiled warm or cold water and stir. Cool down to the baby's drinking temperature (approx. 37 °C). Check the temperature.

Cup for toddlers:
 Sprinkle 1 teaspoon (4 g) into a cup with 200 ml freshly boiled warm or cold water and stir. Cool down to the baby's drinking temperature (approx. 37 °C). Check the temperature.

Always prepare the tea freshly and do not sweeten additionally!
